# E2EM

CSM\_E2EM\_DS\_E\_10\_3

## **Long-distance Proximity Sensor**

- Long-distance detection at up to 30 mm enables secure mounting with reduced problems due to workpiece collisions.
- No polarity for easy wiring with DC 2-wire models.
- Cable protector provided as a standard feature.

Be sure to read Safety Precautions on page 6.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

## **Ordering Information**

## Sensors [Refer to Dimensions on page 7.]

DC 2-Wire, Pre-wired Models

<sup>\*1.</sup> There are installation restrictions that apply to Shielded Sensors. Refer to Reference *Influence of Surrounding Metal* in *Safety Precautions* on page 6.
\*2. Pre-wired M12 Connector Models with a cable length of 300 mm are also available. Add -M1J to the end of the model number (example: E2EM-X4X1-M1J). Note: Orders for DC 2-Wire Models will be accepted until the end of March 2023.

## DC 3-Wire, Pre-wired Models

<sup>\*1.</sup> Use the Sensor within the range in which the setting indicator (green LED) is ON (except X2 Models).

<sup>\*2.</sup> The response frequency is an average value.

Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

<sup>\*3.</sup> The residual voltage is 5 V. Make sure that the device connected to the Sensor can withstand the residual voltage. (Refer to page 6 for details.)

## Connections for Sensor I/O Connectors

Refer to Introduction to Sensor I/O Connectors/Sensor Controllers for details.

## **Safety Precautions**

## Refer to Warranty and Limitations of Liability.

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

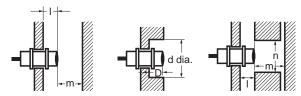

#### **Precautions for Correct Use**

Do not use this product under ambient conditions that exceed the ratings.

#### Design

#### **Influence of Surrounding Metal**

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.

#### Influence of Surrounding Metal (Unit: mm)

#### **AND/OR Connections**

Error pulses and leakage current may prevent application in AND or OR circuits. Always confirm operation in advance to confirm if there are any problems in operation.

#### **Mutual Interference**

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

#### Mutual Interference (Unit: mm)

| Туре      | Item      | M8 | M12 | M18 | M30 |     |

## Connecting a DC 2-wire Proximity Sensor to a PLC (Programmable Controller)

#### **Required Conditions**

Connection to a PLC is possible if the specifications of the PLC and the Proximity Sensor satisfy the following conditions. (The meanings of the symbols are given at the right.)

1. The ON voltage of the PLC and the residual voltage of the Proximity Sensor must satisfy the following.

 $V_{ON} \le V_{CC} - V_{R}$ 

2. The OFF current of the PLC and the leakage current of the Proximity Sensor must satisfy the following.

loff ≥ leak

(If the OFF current is not listed in the PLC's input specifications, take it to be 1.3~mA.)

3. The ON current of the PLC and the control output of the Proximity Sensor must satisfy the following.

lout (min.)  $\leq$  lou  $\leq$  lout (max.)

The ON current of the PLC will vary, however, with the power supply voltage and the input impedance, as shown in the following equation.

Ion =  $(Vcc - VR - \underline{Vpc}) / Rin$ 

#### Example

In this example, the above conditions are checked when the Proximity Sensor is the E2EM-X8X1 and the power supply voltage is 24 V.

- 1.  $Von (14.4 \text{ V}) \leq Vcc (20.4 \text{ V}) Vr (5 \text{ V}) = 15.4 \text{ V}$ : OK
- 2. Ioff (1.3 mA) ≥ Ileak (0.8 mA): OK
- 3. Ion = [Vcc (20.4 V) VR (5 V)  $\underline{\text{VPc (4 V)}}$ ] / Rin (3 k $\Omega$ ) = Approx. 3.8 mA

Therefore, lout (min.) (3 mA)  $\leq$  lon (3.8 mA): OK Connection is thus possible.

### **Connection Example (Reference)**

| PLC                 | $\begin{array}{lll} \text{Von:} & \text{ON voltage (14.4 V)} \\ \text{Ion:} & \text{ON current (typ. 7 mA)} \\ \text{IoFF:} & \text{OFF current (1.3 mA)} \\ \text{Rin:} & \text{Input impedance (3 k}\Omega) \\ \text{Vpc:} & \text{Internal residual voltage (4 V)} \\ \end{array}$ |
|---------------------|---|
| Proximity<br>Sensor | VR: Output residual voltage (5 V) Ileak: Leakage current (0.8 mA) IouT: Control output (3 to 100 mA) Vcc: Power supply voltage (PLC: 20.4 to 26.4 V)  |

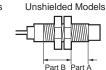

#### Mounting

#### **Tightening Force**

Do not tighten the nut with excessive force. A washer must be used with the nut.

Note: 1. The allowable tightening strength depends on the distance from the edge of the head, as shown in the following table. (A is the distance from the edge of the head. B includes the nut on the head side. If the edge of the nut is in part A, the tightening torque for part A applies

2. The following strengths assume washers are being used.

|       | Torque   | Par               | Part B  |        |
|-------|----------|-------------------|---------|--------|
| Model |          | Dimension<br>(mm) | Torque  | Torque |
| M8    | Shielded | 9                 | 12 N·m  |        |
| M12   |          |                   | 30 N·m  |        |
| M18   |          | 70 N·m            |         |        |
| M30   |          |                   | 180 N·m |        |

(Unit: mm) Tolerance class IT16 applies to dimensions in this data sheet unless otherwise specified.

## **Dimensions**

## **Pre-wired Models (Shielded)**

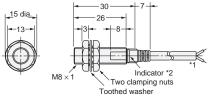

**Mounting Hole** 

| Dimensions | M8                       | M12                       | M18                       | M30                                    |

#### E2EM-X2C

- 1. 4-dia. vinyl-insulated round cable with 2/3 conductors (Conductor cross section: 0.3 mm², Insulator diameter: 1.3 mm), Standard length: 2 m The cable can be extended up to 200 m (separate metal conduit).

  2. Operation indicator (yellow)

## E2EM-X4□□

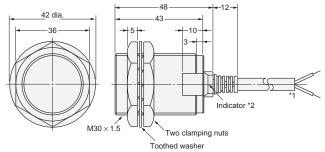

- 1. 4-dia. vinyl-insulated round cable with 2/3 conductors
- 1. 4-oia. Vinyl-insulated rotund cable with 2/3 conducti (Conductor cross section: 0.3 mm². Insulator diameter: 1.3 mm), Standard length: 2 m 2. X1 Models: Operation indicator (red) Setting indicator (green)
  X2 Models: Operation indicator (red)
  C Models: Operation indicator (yellow)

## E2EM-X8□□

- 6-dia. vinyl-insulated round cable with 2/3 conductors (Conductor cross section: 0.5 mm², Insulator diameter: 1.9 mm), Standard length: 2 m
- 2. X1 Models: Operation indicator (red) Setting indicator (green)
  X2 Models: Operation indicator (red)
  C Models: Operation indicator (yellow)

## E2EM-X15

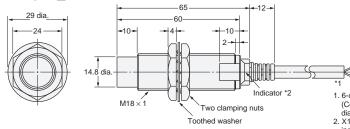

- 1. 6-dia, vinvl-insulated round cable with 2/3 conductors (Conductor cross section: 0.5 mm², Insulator diameter: 1.9 mm), Standard length: 2 m 2. X1 Models: Operation indicator (red) Setting
- X1 Models: Operation indicator (red)
  X2 Models: Operation indicator (red)
  C Models: Operation indicator (yellow)

## **Pre-wired Models** (Unshielded)

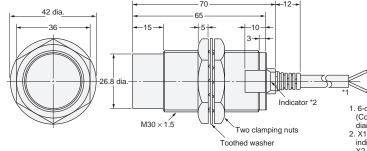

#### E2EM-X16MX

- 1. 6-dia. vinyl-insulated round cable with 2 conductors (Conductor cross section: 0.5 mm², Insulator diameter: 1.9 mm), Standard length: 2 m
  2. X1 Models: Operation indicator (red), Setting indicator (green)
  X2 Models: Operation indicator (red)

## E2EM-X30MX

- 6-dia. vinyl-insulated round cable with 2 conductors (Conductor cross section: 0.5 mm², Insulator diameter: 1.9 mm), Standard length: 2 m
   2. X1 Models: Operation indicator (red), Setting indicator (green)
   X2 Models: Operation indicator (red)

## **Connector Models** (Shielded)

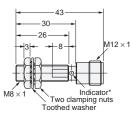

#### **Mounting Hole Dimensions**

| Dimensions | M8                       | M12                                    | M18                                    | M30                                    |
|------------|--------------------------|--|--|--|
| F (mm)     | 8.5 <sup>+0.5</sup> dia. | 12.5 <sup>+0.5</sup> <sub>0</sub> dia. | 18.5 <sup>+0.5</sup> <sub>0</sub> dia. | 30.5 <sup>+0.5</sup> <sub>0</sub> dia. |

## Terms and Conditions Agreement

#### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

#### Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <a href="http://www.omron.com/global/">http://www.omron.com/global/</a> or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.
Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2023.2

In the interest of product improvement, specifications are subject to change without notice.
